EUROSEC 2014

13 April 2014, Amsterdam, The Netherlands

About EuroSec 2014

The seventh European Workshop on Systems Security aims to bring together researchers, practitioners, system administrators, system programmers, and others interested in the latest advances in the security of computer systems and networks. The objective of the workshop is to discuss novel, practical, *systems-oriented work*.

Topics of Interest

- New attacks, evasion techniques, and defenses.
- Operating system security.
- Mobile systems security.
- Malicious code analysis and detection.
- Web security.
- Network security.
- Reverse engineering and binary analysis.
- Identity management and anonymity.
- Hardware and physical security.
- Virtual machines and hypervisors.
- Measuring security.
- Trusted computing and its applications.
- System security aspects of privacy.
- Identity management and anonymity.
- Systems-based forensics.
- Systems work on fighting spam/phishing.
- Automated techniques for vulnerability analysis and discovery.
- Embedded system security.
- Security of critical infrastructures.

A workshop of

Organisation

The workshop is co-chaired by
- **Davide Balzarotti**
(EURECOM)
- **Juan Caballero**
(IMDEA Software Institute)

Important Dates

Submissions: February 15, 2014
Acceptance by: March 5, 2014
Final papers: March 28, 2014
